# Textured (Sweet Feed)

Combination of oats, corn, and pellets covered with molasses

## Hi Energy 14

Textured feed for training and racing horses that contains 14% protein to help build muscle with high levels of fat to provide a source of energy that will create less lactic acid in the muscle, (muscles will not be as sore after training). Also works well for putting on weight in mature horses.

<b>High Levels of Vitamin E</b>	<i>Protein..... 14%</i>
<b>Direct Fed Microbials (probiotics)</b>	<i>Fat..... 6%</i>
<b>Yeast for improved digestion</b>	<i>Fiber..... 10%</i>

## Junior

A 16% textured foal creep that contains 6% fat for growth. It contains high level of amino acids to promote growth, high calcium and phosphorus for bone development, and copper to help maintain healthy growth plates. Chelated minerals help prevent developmental orthopedic disorders.

<b>Chelated Minerals (better absorption)</b>	<i>Protein..... 16%</i>
<b>High Levels of Vitamin E</b>	<i>Fat..... 6%</i>
<b>Direct Fed Microbials (probiotics)</b>	<i>Fiber..... 10%</i>
<b>Yeast for improved digestion</b>	

## 11% Sweet Horse

11% Textured feed that is the most economical textured feed for maintenance horses

<i>Protein..... 11%</i>
<i>Fat..... 2.5%</i>
<i>Fiber..... 10.5%</i>

## Choice 12

12% protein textured horse feed for maintenance, moderate work, and breeding mares

<b>High Levels of Vitamin E</b>	<i>Protein..... 12%</i>
<b>Direct Fed Microbials (probiotics)</b>	<i>Fat..... 3%</i>
<b>Yeast for improved digestion</b>	<i>Fiber..... 10%</i>

*"I've switched to Equi-Sential's horse line of products, and I am loving what I am seeing on my younger and older horses, with their coats, their hooves, and their energy levels and their stamina. It's awesome!!"*

*Diana Jackson Petrosky*

(Multiple World Champion in Halter and Barrel Racing)

## Choice 14

High energy feed for horses that need instant energy from grains. It is a 14% protein textured horse feed best for growing horses, lactating mares and for heavy working horses.

<b>High Levels of Vitamin E</b>	<i>Protein..... 14%</i>
<b>Direct Fed Microbials (probiotics)</b>	<i>Fat..... 3%</i>
<b>Yeast for improved digestion</b>	<i>Fiber..... 10%</i>

**Equi-Sential®**

# Pelleted Feed

*(Increases Digestibility)*

## Safe 14

14% pelleted horse feed with very low levels of starch that is safe for all horses. The energy is derived from fat and digestible fiber so there isn't a spike in glucose. Because of the low starch, your horse will be less likely to develop metabolic disorders, colic, founder, tying-up, ulcers and increased blood glucose.

<b>Chelated Minerals</b> <i>(better absorption)</i>	
<b>High Levels of Vitamin E</b>	Protein..... 14%
<b>Direct Fed Microbials</b> <i>(probiotics)</i>	Fat..... 7%
<b>Yeast for improved digestion</b>	Fiber..... 15%
<b>Omega 3 Fatty Acids</b> <i>(flax)</i>	
<b>Rice Bran</b>	

## Stable Horse

13% pelleted horse feed that is the most economical, "safe" feed for maintenance or light work. It contains low levels of starch and the energy is derived from fat and digestible fiber so there isn't a spike in glucose.

<b>High Levels of Vitamin E</b>	Protein..... 13%
<b>Yeast for improved digestion</b>	Fat..... 5%
	Fiber..... 10%

## 14% Senior

14% molasses covered pelleted horse feed for senior horses that have a harder time eating because of poor teeth. Contains loose beet pulp, which is beneficial to increase the softness of the stool to help prevent colic and is a source of slow released energy. There are guaranteed levels of biotin for hoof health and contains chelated trace minerals for maximum absorption. *(contains more energy than the 12% Senior = better weight gain)*

<b>Chelated Minerals</b> <i>(better absorption)</i>	Protein..... 16%
<b>High Levels of Vitamin E</b>	Fat..... 6%
<b>Direct Fed Microbials</b> <i>(probiotics)</i>	Fiber..... 10%
<b>Yeast for improved digestion</b>	Biotin....0.45mg/lb

## Supreme 12

12% pelleted horse feed with low levels of starch that is safe for all horses. The energy is derived from the 8% fat and digestible fiber so there isn't a spike in glucose. It is designed for maintenance, breeding mares, working horses and works extremely well for weight gain.

<b>Chelated Minerals</b> <i>(better absorption)</i>	Protein..... 12.5%
<b>High Levels of Vitamin E</b>	Fat..... 8%
<b>Slow Release Energy</b> <i>(Beet Pulp)</i>	Fiber..... 18%
<b>Yeast for improved digestion</b>	
<b>Omega 3 Fatty Acids</b> <i>(flax)</i>	
<b>Rice Bran</b>	

## Mare & Foal

16% pelleted horse feed for foals and promotes good milking in mares. It contains high levels of calcium and phosphorus for bone development and elevated levels of amino acids to promote growth. It also has high levels of copper to help maintain healthy growth plates. Chelated minerals help prevent developmental orthopedic disorders.

<b>Chelated Minerals</b> <i>(better absorption)</i>	Protein..... 16%
<b>High Levels of Vitamin E</b>	Fat..... 4%
<b>Direct Fed Microbials</b> <i>(probiotics)</i>	Fiber..... 10%
<b>Yeast for improved digestion</b>	

## 12% Senior

Foraged based senior feed that is a 12% protein, molasses covered, pelleted feed. It is a softer feed so the older horse that has poor teeth will have an easier time eating. It contains beet pulp *(less than the 14% Senior)* for slow release energy and to soften the stool and is pelleted to improve digestibility and reduce fines.

<b>Chelated Minerals</b> <i>(better absorption)</i>	Protein..... 16%
<b>High Levels of Vitamin E</b>	Fat..... 6%
<b>Direct Fed Microbials</b> <i>(probiotics)</i>	Fiber..... 10%
<b>Yeast for improved digestion</b>	Biotin....0.45mg/lb
