

"Toby could not quite get completely up the stairs and was having some trouble getting around the house because of arthritis. I started him on Natex™ and in two weeks the owner called and was extremely happy saying that Toby was running around the house like a puppy."

"This is when I became a firm believer in Natex™ and what affects it could have on arthritic dogs."

"I would recommend this product to any dog suffering from the pains of everyday osteoarthritis."

Dr. Jeremiah Vondra
Lothrop Animal Clinic
Crete, Nebraska

"Rusty is an 11-year-old lab who has been around for quite a bit of hunting and horseback riding...he has always had an active lifestyle. In the past couple of years Rusty has got up slowly and limped from sore joints. I put him on the Natex™ and in just three weeks time, Rusty really responded. I am amazed on how well he gets up and walks. You can truly see that Rusty is feeling like a younger dog"

Natex™

Canine Joint Supplement

Glucosamine
MSM
Shark Chondroitin
Shark Cartilage
Vit. A, C & E
Manganese
Omega 3 Fatty Acids
Bromelain

The Most Complete Joint Supplement

"This product [Natex] has literally saved my 12-year old Pomeranian's life. After 2 + months with the product, our dog took a walk down 14 stairs to go outside. Prior to this, he would sit at the top of the stairs and bark for someone to retrieve him. When we started on the product, his back legs were collapsing when he would walk because of the pain from arthritis."

"The second hurdle was to get him to take the medicine as he is the most finicky eater around. They have designed this product to taste like meat flavor and it works. I give him a daily dosage and he finishes up every last bit."

"Finding this product was a last ditch effort to see if we could improve his quality of life without having to put him to sleep and it has done just that... brought back quality of life for our dog!"

Vicky K.

"Our 7-year-old Cocker Spaniel (Tae) had severe back problems by his back legs & we put him on Natex™ 2 times a day for one week and we have seen great improvement in his mobility..."

Robert H.

Natex™

Do you want your pet to feel more youthful and energetic?

Natex™ increases the lubrication of joints (decreasing pain) and repairs damage caused by old age and stress, allowing your pet to move around more freely, **Improving Their Quality of life.**

Powerful Ingredients

Glucosamine (1,500 mg/serving*)

A powerful joint reliever which supplies the "building blocks" for cartilage which leads to faster cartilage repair and relief from joint injuries.

MSM (425 mg/serving*)

An anti-inflammatory agent which acts in helping return the joint to a "normal" state.

Shark Chondroitin Sulfate (37.5 mg/serving*)

Acts to cushion and support joints, attract nutrients, protect against joint injury, and provide the matrix for cartilage formation.

Vitamin A (160IU/serving*)

Required for growth and repair of body tissues.

Manganese (7.5 mg/serving*)

Essential in several stages of cartilage and bone matrix formation.

Ascorbic Acid (125 mg/serving*)

A powerful antioxidant used to provide a strong defense system and aid in production of cartilage cells which keeps your horse healthy and performing at their peak ability.

Bromelain (10 mg/serving*)

Provides an analgesic effect for your horse which leads to reduction or elimination of pain.

Shark Cartilage (25 mg/ serving*)

Another form of chondroitin added for extra joint support, cushioning, and protection from injury.

Omega 3 Fatty Acids (7 mg/serving*)

Anti-Inflammatory Agent, which reduces pain in aching joints.

Vitamin E (4 IU/serving*)

Powerful antioxidant that acts against free radicals in the body.

*** Concentrations Calculated for the Serving Size of a 40-75 lb animal**
